**Fig.1** Pavers can be placed directly on the CTRisers and are spaced automatically by the raised cross pieces.

**Fig.2** Shims of the appropriate thickness can be used individually or combined to level the pavers over uneven surfaces up to 6" in height.

**Fig.3** Multiple shims of the same or different thicknesses can be combined to make up the exact height required.

**Features**

- Long Lasting
- Weatherproof
- Membrane Roof Friendly
- Leed Certified

**Applications**

- Roofs
- Landscaping
- Terraces
- Porches
- Patios
