## Traffic Safety System

SAFETY IS OUR PRIORITY

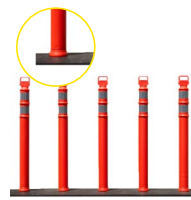

# Vulcanized Traffic Bases

Ensure all traffic safety

## NWR TRAFFIC SAFETY SYSTEMS

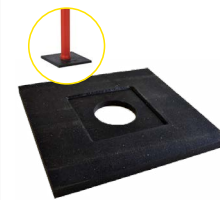

With over 50 years of experience and product development, North West Rubber is a North American industry leader in Traffic Safety Systems. We manufacture and supply our products to the traffic safety and industrial safety markets.

All our traffic system bases are designed to be flexible to keep the traffic post weighted and upright, even on rough or uneven surfaces. Our bases are available curb, square, hexagonal or octagonal shapes. Options also include various weights and sizes to suit your needs and specifications. All our bases are made with a combination of recycled vulcanized rubber (no polyurethane) and a durable virgin rubber.
