

PlayFall Tile Surfacing System

Product Overview

Made from 100% recycled rubber, PlayFall tiles offer a sustainable and durable surfacing solution for playgrounds. Their porous design promotes site drainage, reducing the risk of pooling and slip hazards, while also minimizing maintenance needs. Available in two thicknesses, these tiles accommodate fall heights up to 10 feet.

For installations where fall heights exceed 6 feet, the inclusion of a PlayPad underlayment provides additional impact attenuation, delivering optimal safety performance across a range of play environments.

SPECIFICATIONS

PlayFall Tile

2' x 2' x 1.75" | 2' x 2' x 3"

1' x 1' cross-hatch surface pattern
Available in Black, Green, Red, Blue, Grey, and Brown

PlayPad Foam

37.4" x 90.15" x 2"

Key Benefits

- ◆ **Certified Impact Attenuation:** Tested to meet ASTM standards, these rubber tiles provide effective fall cushioning for heights up to 10 feet, enhancing playground safety.
- ◆ **Durable and Long-Lasting:** Resists wear, compression, and weathering, in varying climates, ensuring reliable performance with minimal upkeep.
- ◆ **Quick Drainage and Weather Resistant:** Designed to drain water efficiently and withstand freeze-thaw cycles, the surface will remain safe and slip-resistant all year-round.
- ◆ **Modular and Flexible:** The interlocking design makes installation easy and allows for customizable layouts and simple repairs or updates.
- ◆ **High Lifetime Value:** Low maintenance requirements and durable construction reduce replacement and upkeep costs, delivering cost-effective performance over the life of the playground.

| Fall Height | Configuration Required |
|-------------|----------------------------------|
| 4' | 1.75" PlayFall Tile |
| 6' | 3" Playfall Tile |
| 8' | 1.75" PlayFall Tile + 2" PlayPad |
| 10' | 3" Playfall Tile + 2" PlayPad |
