

VULCANIZED MUSCLE MATS

North West Rubber's Muscle Mats are 100% vulcanized recycled rubber interlocking systems engineered to support weightlifting and training activities within high-traffic environments. These premium equipment mats are ideal for use underneath functional trainers, free-weights, barbells, and cardio equipment; ensuring superior floor protection, comfort and equipment longevity.

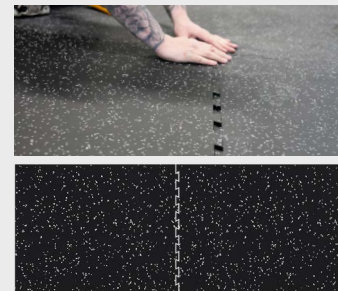

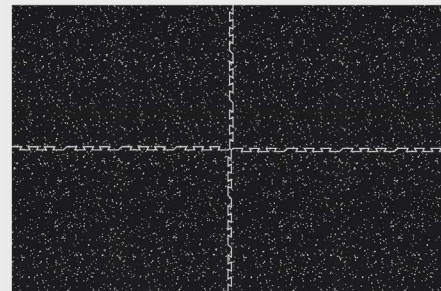

FEATURES & BENEFITS

- 
Durable & Long Lasting
 NWR's vulcanization process creates a dense rubber product which is highly resistant to abrasion and wear and tear.
- 
Reduces Joint & Leg Stress
 Engineered to provide an optimal level of energy return to reduce strain to the feet, legs, and joints of users.
- 
Easy to Clean
 Muscle Mats require minimal maintenance; simply vacuum or damp mop as-needed.
- 
Anti-Microbial
 The poreless, vulcanized rubber surface is moisture resistant, absorbing up to 20 times less moisture than polyurethane bound recycled rubber mats and will not harbor bacteria.
- 
Protects Equipment & Floor
 Excellent force reduction reduces the risk of damage to your equipment and floor.
- 
Precision Cut Interlock
 Each Muscle Mat is precision cut using NWR's ultrasonic cutting technology for consistent thickness and tight, nearly invisible interlock connections.

SPECIFICATIONS

Mat Size	7'-7" x 11'-5.5"	2'-11" x 7'-7.1"
Assembly	4 Interlocking Pieces	2 Interlocking Pieces
Thickness	8mm (5/16")	
Weight	183.7lbs	45.7lbs
Material	100% Recycled Vulcanized Rubber	
Color	Grey Speckle	

7'-7" x 11'-5.5"

2'-11" x 7'-7.1"
